

Basic information

Project name

Project for Determining the Outbreak Mechanisms and Development of a Surveillance Model for Multi-drug Resistant Bacteria

Line Agency

Ministry of Health (MOH)

Project Owner

National Institute of Nutrition (NIN)

Representative Institution in Japan

Osaka University

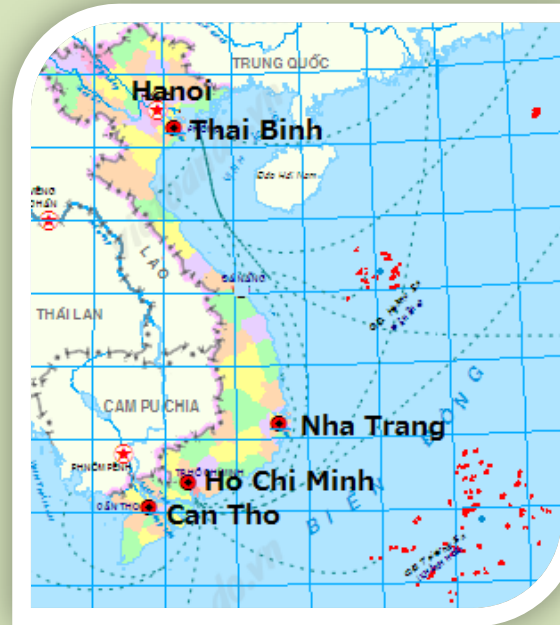

Project duration

March 2012 – March 2017

Project Office

National Institute of Nutrition, Room 308, 48B
Tang Bat Ho, Hai Ba Trung, Hanoi, Vietnam
Tel/Fax: (+84-4) 3972-9383
<http://www.satrebs-mdrb.jp/>

Project sites

5 Provinces/cities: Hanoi, Thai Binh, Nha Trang, Ho Chi Minh City, Can Tho

- (1) National Institute of Nutrition
- (2) Thai Binh Medical University
- (3) Pasteur Institute of Nha Trang
- (4) Institute of Hygiene and Public Health HCM
- (5) Binh Dien Whole Sale Market Company
- (6) Can Tho University

SATREPS – MDRB PROJECT

**PROJECT FOR
DETERMINING THE OUTBREAK
MECHANISMS AND DEVELOPMENT OF
A SURVEILLANCE MODEL FOR
MULTI-DRUG RESISTANT BACTERIA**

Project information

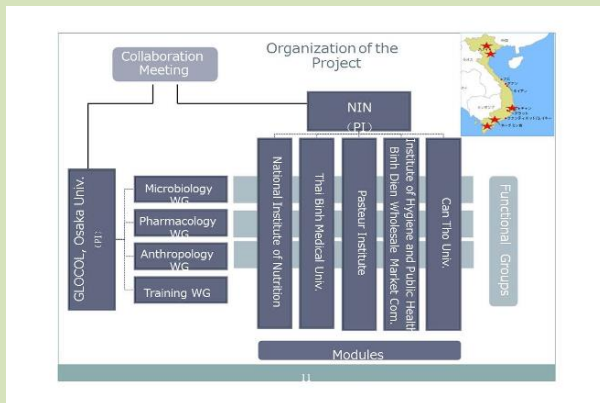

Project Purpose

Research capacity to continuously monitor the multi-drug resistant bacteria is strengthened.

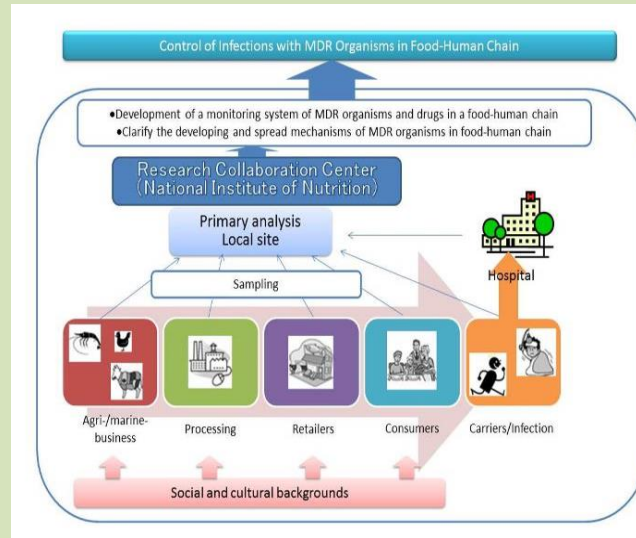

Outputs

1. The wide spread mechanisms of multi-drug resistant bacteria in Vietnam are clarified microbiologically, pharmacologically and anthropologically.
2. A comprehensive monitoring system for antibiotics residues and antibiotic-resistant bacteria over the process from food production to intake is developed.
3. Researchers and technical staff related to food safety monitoring at the targeted research institutes are trained.
